

BrightAuthor Beta 2.3.0. 73

January 27, 2012

This beta release includes new features, bug fixes and improvements.

New Features

- Support for German, Italian, French and Spanish languages.
 - BrightAuthor presents a language selection during installation

Previous Release 2.3.0.71

- Support for the following SD video modes
 - ntsc-m, ntsc-m-jpn
 - pal-I, pal-bg, pal-n, pal-nc, pal-m

Improvements and Bug Fixes

- Changed minimum firmware requirement to 3.7.44
- Default Image timeout changed from 3 to 6 seconds
- Fixed: Touch events work properly in video only zone
- Fixed: You can now add log handler when publishing for Simple File Networking
- Fixed: Custom autorun now published with local file networking
- Fixed: Non DHCP units now work properly with BrightSign Network
- Fixed: LiveText rotation/alignment works properly
- Fixed: LiveText OK button now accessible when added to a small zone
- Fixed: Interactive Menu preview now drawn consistently
- Fixed: Media with multiple instances in a Dynamic Playlist now play correctly
- Fixed: UDP events now work properly with Sync events

Note: Only one Media RSS feed can be cached at a time. When switching from one Media RSS feed to another within the same zone, the BrightSign will flush the cache and download the next Media RSS feed in the playlist before playing it back.

BrightAuthor Requirements

- PC with Windows Vista or Windows 7, plus Microsoft .Net Framework 3.5 or later
- BrightSign HD110, HD210, HD210w, HD410, HD1010, HD1010w, or TD1012
- Firmware version 3.7.50 or later
