

BRIGHTSIGN AUTOWALL™

HTML-BASED VIDEO WALLS THAT SUPPORT MORE THAN JUST VIDEO

AutoWall is a powerful new feature that embraces the power of HTML5 to create unique multimedia video walls with ease. AutoWall includes a BrightAuthor Plugin Kit that allows users familiar with creating HTML5 content to build video walls that automatically scale to the number of players connected and supports a wide array of multimedia content including video, images, tickers, live feeds & HTML5 widgets.

Features

- Landscape multimedia video walls with HTML-based layouts
- Automatically scales based on the number of players/screens in the wall
- Frame accurate synchronization & support for interactivity via HTML
- Video content is populated from BrightSign Network Dynamic Playlists or MRSS feeds
- Multiscreen ticker option with content populated from BrightSign Network or RSS feeds
- Support for any publishing method (Local File Networking, BrightSign Network, etc.)

AutoWall Plugin Kit (beta version)

- Includes the AutoWall plugin and template BrightAuthor project and HTML files
- Requires BrightAuthor v4.6.0.5 or higher & firmware v6.2.63.2 or higher
- Supported on all Series 3 BrightSign players
