BrightSign®

Fleet Device Management

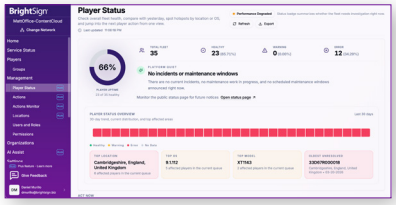

BrightSign®
CONTROL PLUS

BrightSign Control Plus is a premium tier cloud-based service that delivers all the functionality of BrightSign Control and adds bulk fleet management, remote diagnostics and updates, an AI-powered assistant, and centralized scheduling at scale. Manage entire digital signage fleets with comprehensive dashboards, no matter where your players are.

Accelerate your Operations

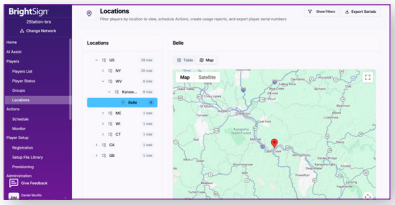

Monitor the status of your entire fleet within seconds.

FLEET-WIDE INSIGHTS

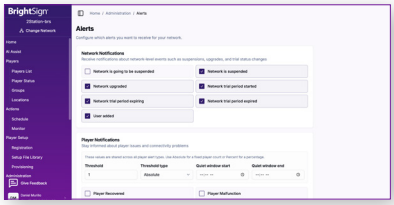

View your entire fleet status, including number of players, firmware versions, errors, and warnings.

GEOGRAPHICAL LOCATIONS

Group your entire fleet by location and organize them based on geographical hierarchy.

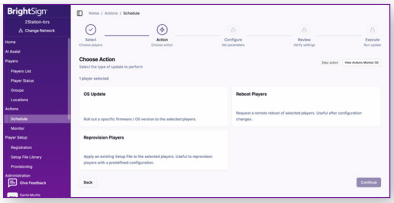

ALERTS AND MONITORING

Identify issues and reduce time, effort, and costs by remotely rebooting, reconfiguring, or diagnosing devices in bulk.

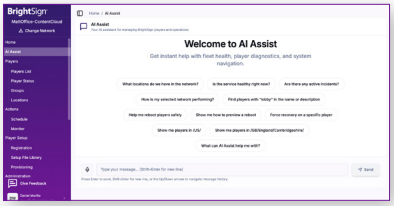

Fleet-Scale Management & Scheduling

Manage large deployments with bulk operations such as OS updates, reboots, and player reprovisioning.. Maintain version consistency by updating fleets of players simultaneously.

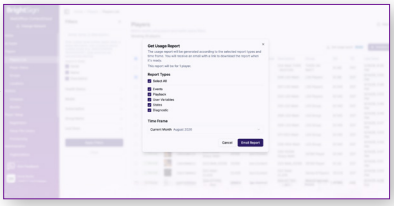

AI-Powered Assistance

Gain instant AI help with diagnostics, system navigation, and learn how to perform actions like reboots, updates, and more. Accelerate issue resolution and reduce the expertise needed to manage complex signage networks at scale.

Gain Visibility on your Operations

Receive comprehensive reports via email on the health and status of your entire fleet, events, and gain player playback insights based on a timeframe of your choosing.

KEY BENEFITS

- Maintain version consistency by updating players in scheduled batches
- Group devices by location, region, or content zone for geographical operations
- Fleet-wide health dashboards and automated alerts
- Remotely reboot, reconfigure, or diagnose devices in bulk
- AI-powered help with diagnostics, system navigation, and more
- Add enterprise device management to existing partner CMS deployments

SUBSCRIPTION PRICING

$59 per screen per year
